Summary

Computer Science and Informatics graduate from the University of Johannesburg. Eager to follow computer programming as a career. Being successful in this career is essential. With my experience in both back-end and front-end programming, my competitiveness to be the best, my hard-working lifestyle, dependable team player, adaptive learning, and innovative thinking, a career in programming is sure to bring success for myself and any future employer.

Skills

- Javascript (including **jquery** and **knockout js**)
- HTML CSS
- Java
- C++
- C# (ASP.Net)
- PHP
- SQL (writing scripts, including Firebird databases)

Experience

Web Development

Interned as a Magento 2 developer (full stack developer) at Consnet working on the CarrolBoyes team. My job involved developing customer specific functionality for their website and on rare occasions, I would test and fix existing code.

Interned as a C# ASP.Net developer (full stack developer) at Delter IT (Altron Fintech). My internship involved enhancing already existing features on their system, fixing bugs, and helping with customer issues relating to the system. After some time in my internship, I would also work on implementing new features for the system.

Extra Skills and Experience

- Working with **Git Source Control** and **Azure DevOps**
- Experienced **Agile Developer**

Education

Bachelor of Science: **Information Technology in Computer Science and Informatics**
